

PEDIATRICS

The Institute of Pediatrics and Child Health of St. Luke's Medical Center is dedicated in providing excellent training in Pediatrics ranging from health promotion services among well patients and continuity of care to challenging medical cases in an environment of patient and family-centered care.

Our Pediatric Residency Training Program highlights the following core competencies: patient care, medical knowledge, practice based learning, interpersonal and communication skills, professionalism and teaching and administrative skills.

The Institute fully supports and encourages research. Studies in cooperation with the Research and Biotechnology, Pediatric Radiology, Sleep Center, Pain Management and other sections are available.
