

ANESTHESIOLOGY

The training program is designed to give a comprehensive academic, clinical, research and attitudinal training to its residents. Training includes exposure to challenging cases in the clinical setting as well as knowledge in cardio-pulmonary resuscitation, critical care and pain control. Residents are given ample opportunities to administer anesthesia and hone their technical skills not only within the confines of the operating rooms but also in the hospital's numerous ancillary units such as the MRI, CT scan, endoscopy unit, cardiac catheterization laboratory and brachytherapy, to name a few. The goal of the training program is to provide extensive didactic, clinical and research resources for the residents to meet their highest professional potential as world-class anesthesiologists.

FAST FACTS:

1. Start and Length of Program: The three-year Residency Training Program starts every January.
2. Average number of Residents per year: 6
3. Training Committee:

Chairman: Imelda Silva-Estellas, MD DPBA

Vice-Chairman: Josephine Samaniego, MD DPBA

Residents' Training Officer: Joy Luat-Inciong, MD DPBA

Training Committee:

Asuncion R. Asis, MD DPBA

Diadema De Jesus, MD DPBA

Rosario Lantin-Doronila, MD DPBA

Leticia Dy, MD DPBA

Nelia Laborte, MD DPBA

Dulce Agcaoili-La'O, MD DPBA

Jonnell Lim, MD DPBA

Cherilyn Carag—Lim, MD DPBA

Feliciano Montano, MD DPBA

Irminia Montecillo, MD DPBA

Jocelynn Reyes, MD DPBA

Chuchi Ruiz, MD DPBA

Josephine Samaniego, MD DPBA

Lourdes Fausto-Sinamban, MD DPBA

Jose Torio, MD DPBA

Maribel Uichanco, MD DPBA

4. Clinical Rotation:

Critical Care

Neuroanesthesia

Pediatric Anesthesia

Obstetric Anesthesia

US Guided-Regional Anesthesia

Pain Management

Cardiac Anesthesia

Thoracic Anesthesia

RESIDENCY TRAINING PROGRAM

5. Outside Rotations: Lung Center of the Philippines – one month
Philippine Children’s Medical Center – one month
