

DERMATOLOGY

The Dermatology Training Program at St. Luke's Medical Center is a PDS accredited 3 year General Dermatology program, patterned after the training requirements of the Philippine Dermatological Society (PDS). Aside from General Dermatology, the program offers generous exposure to community dermatology, research and subspecialty fields, specifically dermatologic and laser surgery; environmental dermatology, pathology and photodermatology. We encourage community involvement and would like to train residents from the provinces who have a desire to practice dermatology in underserved areas of the country. We have a strong bias for the bright, enthusiastic, hardworking doctor, with a vision of making his/ her mark in the field of Dermatology.
